d

Paul,

I've attached two versions of the patent disclosure we discussed last week. The first is the original MS Word document which you have a hard copy of. The second is a conversion to WordPerfect. For some reason the figures in the Word document did not convert properly, so I took them out of the WordPerfect version. I guess you will have to get your graphic artist to rework them.

Davis is working an additional example involving close captioning. Please let us know if you need anything else.

**Subject:** another patent application example

pat\_example.doc

Hi Paul,

Here is the text of the additional patent example we spoke to you about  
(ref: "A method and system for linking user input with streaming data" by  
Davis Pan and Jim Rehg):

<<pat\_example.doc>>

I'll have to fax you a hand drawing of the figure later. Please let me know  
if you have any questions.

Thanks,

Davis
